

KONE DESIGN SIGNALISATION

KSS D20, KSS D50 and KSS D60 series

KONE DESIGN SIGNALISATION FOR PASSENGER LIFTS

KONE Design signalisation adds the finishing touches to your lift by allowing you to match the car operating panel (COP) and landing signalisation with the overall car design. The wide variety of colour options and patterns available make it easy to create a lift that reflects the look and feel of your building.

Choose from our award-winning standard range, add a splash of colour with the new Blocks signalisation, or make the lift experience even more fun for children with the Zoo design. For environments where visibility and accessibility are important, we now offer the high-contrast, accessible Numbers signalisation.

And with customised signalisation, you have the freedom to combine colours, graphics, branding, and a tenant directory to create your own original design.

Customised button placement is valuable especially in dual entrance cars to give better guidance by showing clearly the side of entrance with location of call button in COP.

KONE DESIGN SIGNALISATION INCLUDES:

- COPs with sleek metallic frames
- Frameless numerical floor displays
- A wide choice of colors and patterns
- Easily changeable customised COP faceplates made from shatterproof, impact-resistant polycarbonate
- Landing devices and signalization in matching colours
- User-friendly, accessible design

The KONE Design signalisation combines fresh, exciting colours and unique patterns with flexibility, usability and durability. All car operating panel designs are available in both partial- and full-height versions. The full-height car operating panels are available as flush or surface mounted.

STANDARD DESIGNS

Partial-height COPs are designed for low- to mid-rise buildings.

KSC D20 series partial-height

Made from glossy, durable polycarbonate, the KSC D20 series features:

- A wide range of faceplate colours and designs
- Curved aluminium frames in mirror polished and matt finishes
- Matching solid-colour landing signalisation devices
- The car operating panel is also available in stainless steel

The playful design of the Zoo signalisation makes using the lift more fun for children, while also helping them to find their destination. This design is ideal for children's hospitals, day care centres and schools as well as residential buildings.

UNIQUE DESIGNS

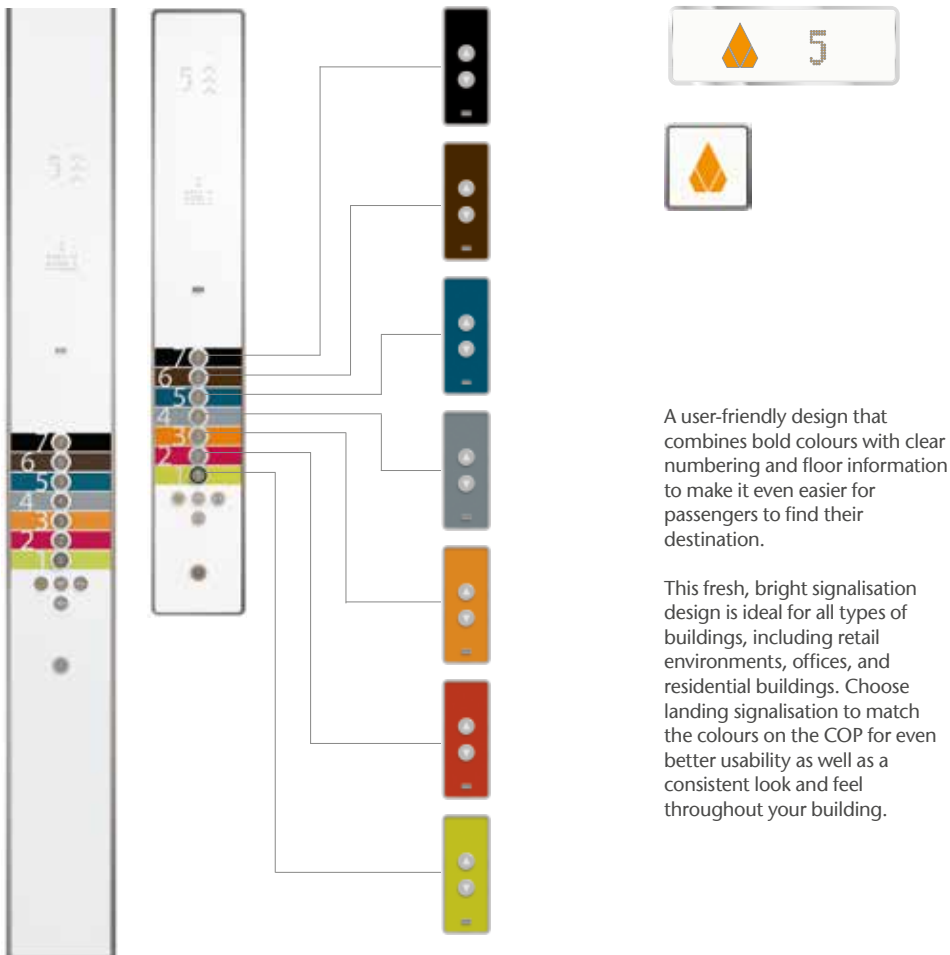

Functionality, accessibility, and fun

Our innovative new range of signalisation designs provide passengers with an accessible, user-friendly lift experience. All three new designs include easy-to-use COPs with eye-catching graphics and matching landing signalisation.

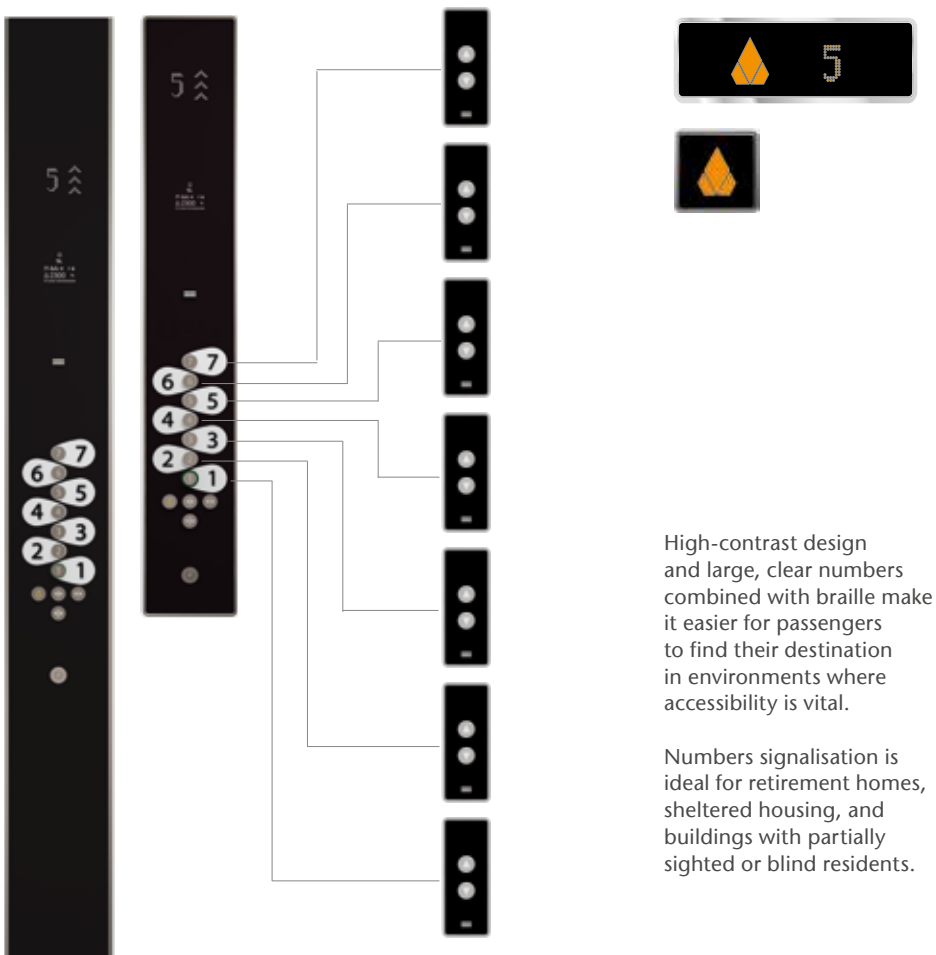

These new designs help you add a splash of colour and fun to your lift design while making it even easier and more convenient for passengers to reach their destination.

- Bold and bright colours
- Colourful, fun animal designs that make it easy for children to remember their floor
- Large, high-contrast numbers combined with braille for improved accessibility
- Available in full- and partial-height, with maximum seven floor buttons

A customised car operating panel adds the finishing touch to your lift design with your choice of faceplate colours and patterns, as well as button layout. When creating your customised faceplate you can either use a KONE design as the basis or create a unique look with your own patterns, graphics, and colours.

Why choose a customised COP?

- Reflect your building's overall design
- Add a stylish, user-friendly informative text field
- Choose from a wide range of faceplate colours and patterns
- Include corporate logos and custom graphics
- Specify the button layout for additional passenger guidance

FUNCTIONAL AND USER-FRIENDLY

By adding guidance information or a tenant directory for the departments and services in your shop, hotel, or office building, you can make using the lift even easier for passengers. A customised button layout can be used to give additional guidance. For example, if your lift has two doors, the position of the buttons can be used to indicate which door to use.

Custom faceplates are both stylish and durable thanks to KONE's advanced, high-resolution printing technology. Graphics are printed on the reverse of the faceplate to protect them from fading and wear and tear.

ALL IT TAKES IS THREE SIMPLE STEPS

Design your custom faceplate in a few simple steps with the help of a KONE sales representative, who will take you through all the available options for colours, patterns, graphics, the tenant directory, and button layouts.

Design your custom COP with a KONE sales representative in just three simple steps using the KONE Design Custom COP excel.

1 CREATE THE TENANT DIRECTORY

Add the tenant names. You can add up to three lines of text for each floor button.

2 DEFINE THE BUTTON LAYOUT

The buttons can be centred, in either one or two rows, or they can be non-centred. Having two rows of buttons is especially useful with a through-type lift, where the position of the buttons indicates which door to use.

3 CHOOSE THE FACEPLATE GRAPHICS

Choose a faceplate design: Select either a KONE graphic or design your own. Then choose the COP type, either full or partial height, and its location. Then choose the number of floors required. It's as easy as that. The KONE Design template will be available in Adobe Illustrator® (ai) format.

THINK OUTSIDE THE BOX

With a custom car operating panel you can add the final touches to your lift by creating a design that reflects the surrounding architecture and the type of building – whether it's a hotel, office, airport, retail environment, or residential building.

VISUAL OPTIONS

LANDING DEVICES

Surface-mounted landing call stations and hall lanterns/indicators are available in eight solid colours and brushed stainless steel. They can be matched to the car interior or used to colour code building floors.

COP BUTTON AND PRESSEL OPTIONS

Signalisation buttons are available with an amber or white acceptance light.

DISPLAYS

Uncluttered, frameless numerical displays, including a scrolling dot matrix option, complete the COP's sleek look.

FRAMES

KONE DESIGN SIGNALISATION FRAMES
ARE AVAILABLE WITH A MIRROR POLISHED
OR SATIN FINISH.

Mirror polished

Satin

SIGNALISATION SPECIFICATIONS

The landing call stations, hall lanterns and indicators are available in eight solid colours and some of them are available as well in brushed stainless steel. See the previous page for colour samples.

HALL LANTERN

HALL LANTERN INDICATORS

LANDING CALL STATIONS

All dimensions are shown in millimetres.

Note:
Landing signalisation devices can be surface mounted on the door frame or wall. The frame material is plastic with metallic mirror or satin finish.

If the surface colour is brushed, then the landing call station faceplate material is stainless steel and hall lantern and indicator faceplate material is polycarbonate. Other colour only polycarbonate faceplates are used.

* Not available in stainless steel

BUTTONS FOR LANDING DEVICES

The KONE Design signalisation landing buttons are surface mounted. Buttons are available with an amber or white acceptance light.

Relief marking with brushed stainless steel finishing

Flush marking with mirror stainless steel finishing

Brushed stainless steel finishing with black collar (EN81-70 compliant)
