

KONE DESTINATION

Provides intuitive and efficient way for people to reach their destination floor.

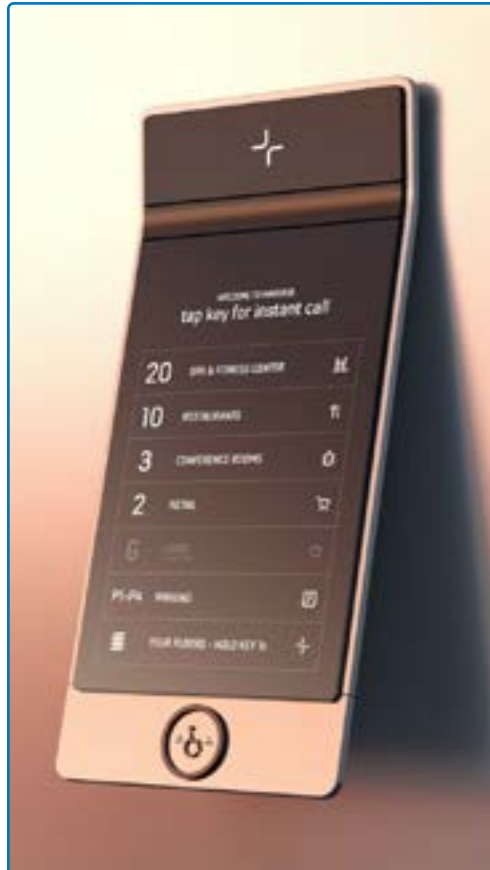

- The next generation destination control solution that combines distinctive design, touch-free access and intuitive guidance. It features a built-in connectivity to adapt to the future and enable easy integrations.
- It designed for optimised people flow, increased lift traffic handling, and convenient way-finding.

PERSONALISATION

- Activate personal menu which allows changing call types and accessing floors in your profile
- The guidance mode to lift can be configured based on user needs e.g. for tenants, regular visitors & guests

USER FRIENDLINESS

- Intuitive and flexible user interface
- Accessibility of different users is catered by adhering to major code compliances
- Direct call to home floor by swiping your access key or mobile key

ADAPTABILITY

- Offers flexibility to accommodate the demands based on future needs
- Monitoring and analytics enable continuous people flow optimisation

DIFFERENTIATION

- The variety of hardware colours and options for user interface customisation in Destination promotes unique identity of the building
- The system allows easy possibility to display individual brands at each floor depending on tenants preference
