

A photograph of a man and a young boy. The man, on the right, is wearing a dark blue sweater over a light blue shirt and is smiling warmly at the boy. The boy, on the left, is wearing a white long-sleeved shirt, a dark blue and white striped tie, and light-colored pants, and is also smiling. They are standing in a modern interior with light-colored walls and a ceiling with recessed lighting. The background is slightly blurred, showing some furniture and decor. The overall atmosphere is one of a happy family moment.

Smart, flexible upgrades
for your lift

KONE Upgrade

Dedicated to
People Flow™

Why modernise?

Even well-maintained lifts will eventually need modernising. Modernise your lift to improve its performance, refresh its appearance and bring it up to today's safety standards.

Does your lift consume too much electricity?

Reduce costs by making your building smarter and more efficient

Outdated lift systems waste energy and money. Modernising improves efficiency, lowers electricity costs, and supports sustainability. Adding connectivity boosts responsiveness and maximizes building value.

Is your lift noisy and looking run-down?

Refresh appearance and increase building value

Old lifts can feel unsafe due to noise and worn appearance. Modernising your lift gives you the design freedom to refresh its appearance and ensures a smoother, more enjoyable ride experience.

Is your lift frequently out of service?

Elevate performance and improve safety

Frequent lift breakdowns disrupt operations. Modernisation boosts reliability, reduces downtime, and ensures long-term peace of mind through our tailored solutions.

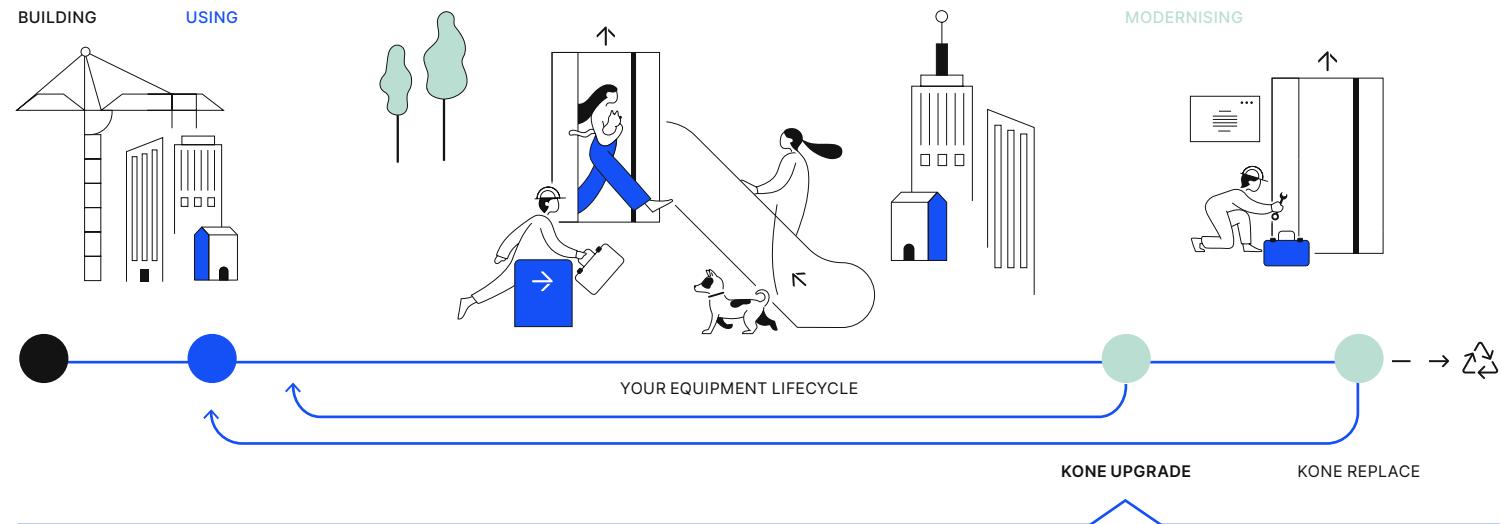

KONE Upgrade

Start modernisation planning early with flexible upgrade packages that keep your lift safe, smooth, and reliable for years to come.

Modernisation extends your lift's lifespan, secures future spare part availability, and helps you avoid disruptions and unexpected repair costs.

Upgrading is a sustainable choice

Reasons to upgrade now

Upgrade early and save time

Upgrading early with KONE means your lift is renewed fast – often in just one week, compared to several weeks for a full replacement. You'll avoid long disruptions, reduce repair needs, and keep your lift running smoothly for years to come.

Avoid costly replacements later

Upgrading now helps you to avoid more expensive and disruptive work later. Modular upgrade packages enable cost effective updates according to your needs and budget, bringing significant cost savings.

Unlock the benefits of connectivity

Connectivity enables predictive maintenance with remote services and additional digital solutions, helping you to get more value out of every square meter.

Retain up to

88%

of materials by upgrading only what you need – compared to a full replacement

Achieve up to

70%

energy savings by upgrading to regenerative technology

Reduce up to

78%

of CO₂ emissions by upgrading instead of replacing

The presented figures represent an estimate on third-party verified LCA (Life Cycle Assessment) calculations and energy measurements. Actual results may vary due to several factors and local conditions. KONE does not assume any liability for the use of this information, nor for any inconsistency or inaccuracy in the information.

Upgrade what matters to you

Electrification & signalization

A brand-new controller and electrification system will improve your lift's reliability, energy efficiency, safety, and accessibility. Adding connectivity unlocks new digital services for building users.

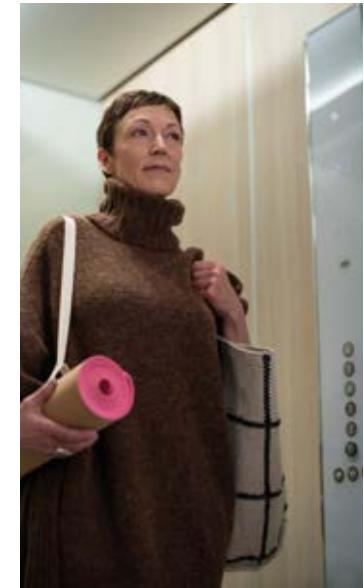

Door operator and door panels

A new automatic door for your lift improves safety. Our lightweight doors maximize space inside the car and ensure a smooth and quiet ride. Advanced software even prevents doors from closing on small fingers.

Hoisting

Upgrading machinery and hoisting technology offers a significant increase in speed, improving traffic handling capacity during peak hours. Safety issues and leveling accuracy are also corrected and ride experience is smooth and quiet.

Car decoration

Improve the appeal of your building with a new design package or by updating specific parts like wall finishes, ceilings, floors and handrails. Explore modern lighting innovations and mirror and display options.

Flexibility with modular upgrades

Whatever your needs or budget, our quick-to-install modular upgrade packages are designed to support you every step of the way.

Choose the outcome you prefer and upgrade your lifts over time, at a pace that suits you.

Start your upgrade journey:

STEP 1 Always start by upgrading the essentials

STEP 2 Then choose what to upgrade next – either step by step or all at once

We'll work with you to find the optimal solution that improves efficiency and ensures long-term peace of mind.

Unlock the benefits of connectivity

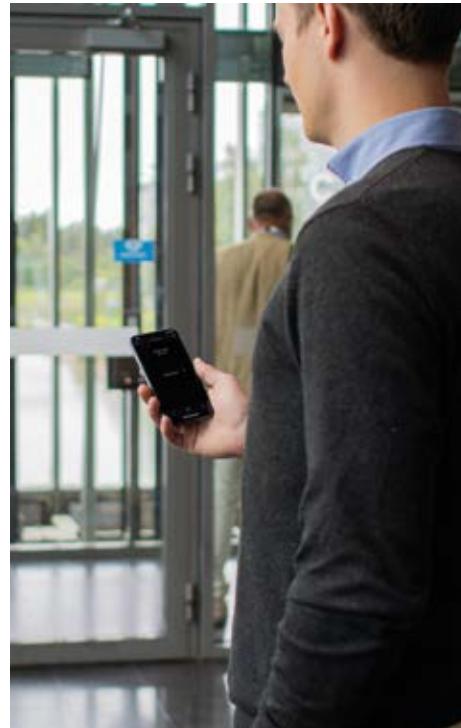

Modernisation adds built-in connectivity to lifts of any brand, enabling predictive maintenance, remote services, and access to KONE digital solutions.

With the KONE open ecosystem, you can easily connect your preferred partners to enhance the overall building experience.

Increase uptime with digitally-enabled predictive maintenance

Unlock the benefits of real-time monitoring, digitally-enabled predictive maintenance and remote repair actions to avoid surprises and speed up resolution.

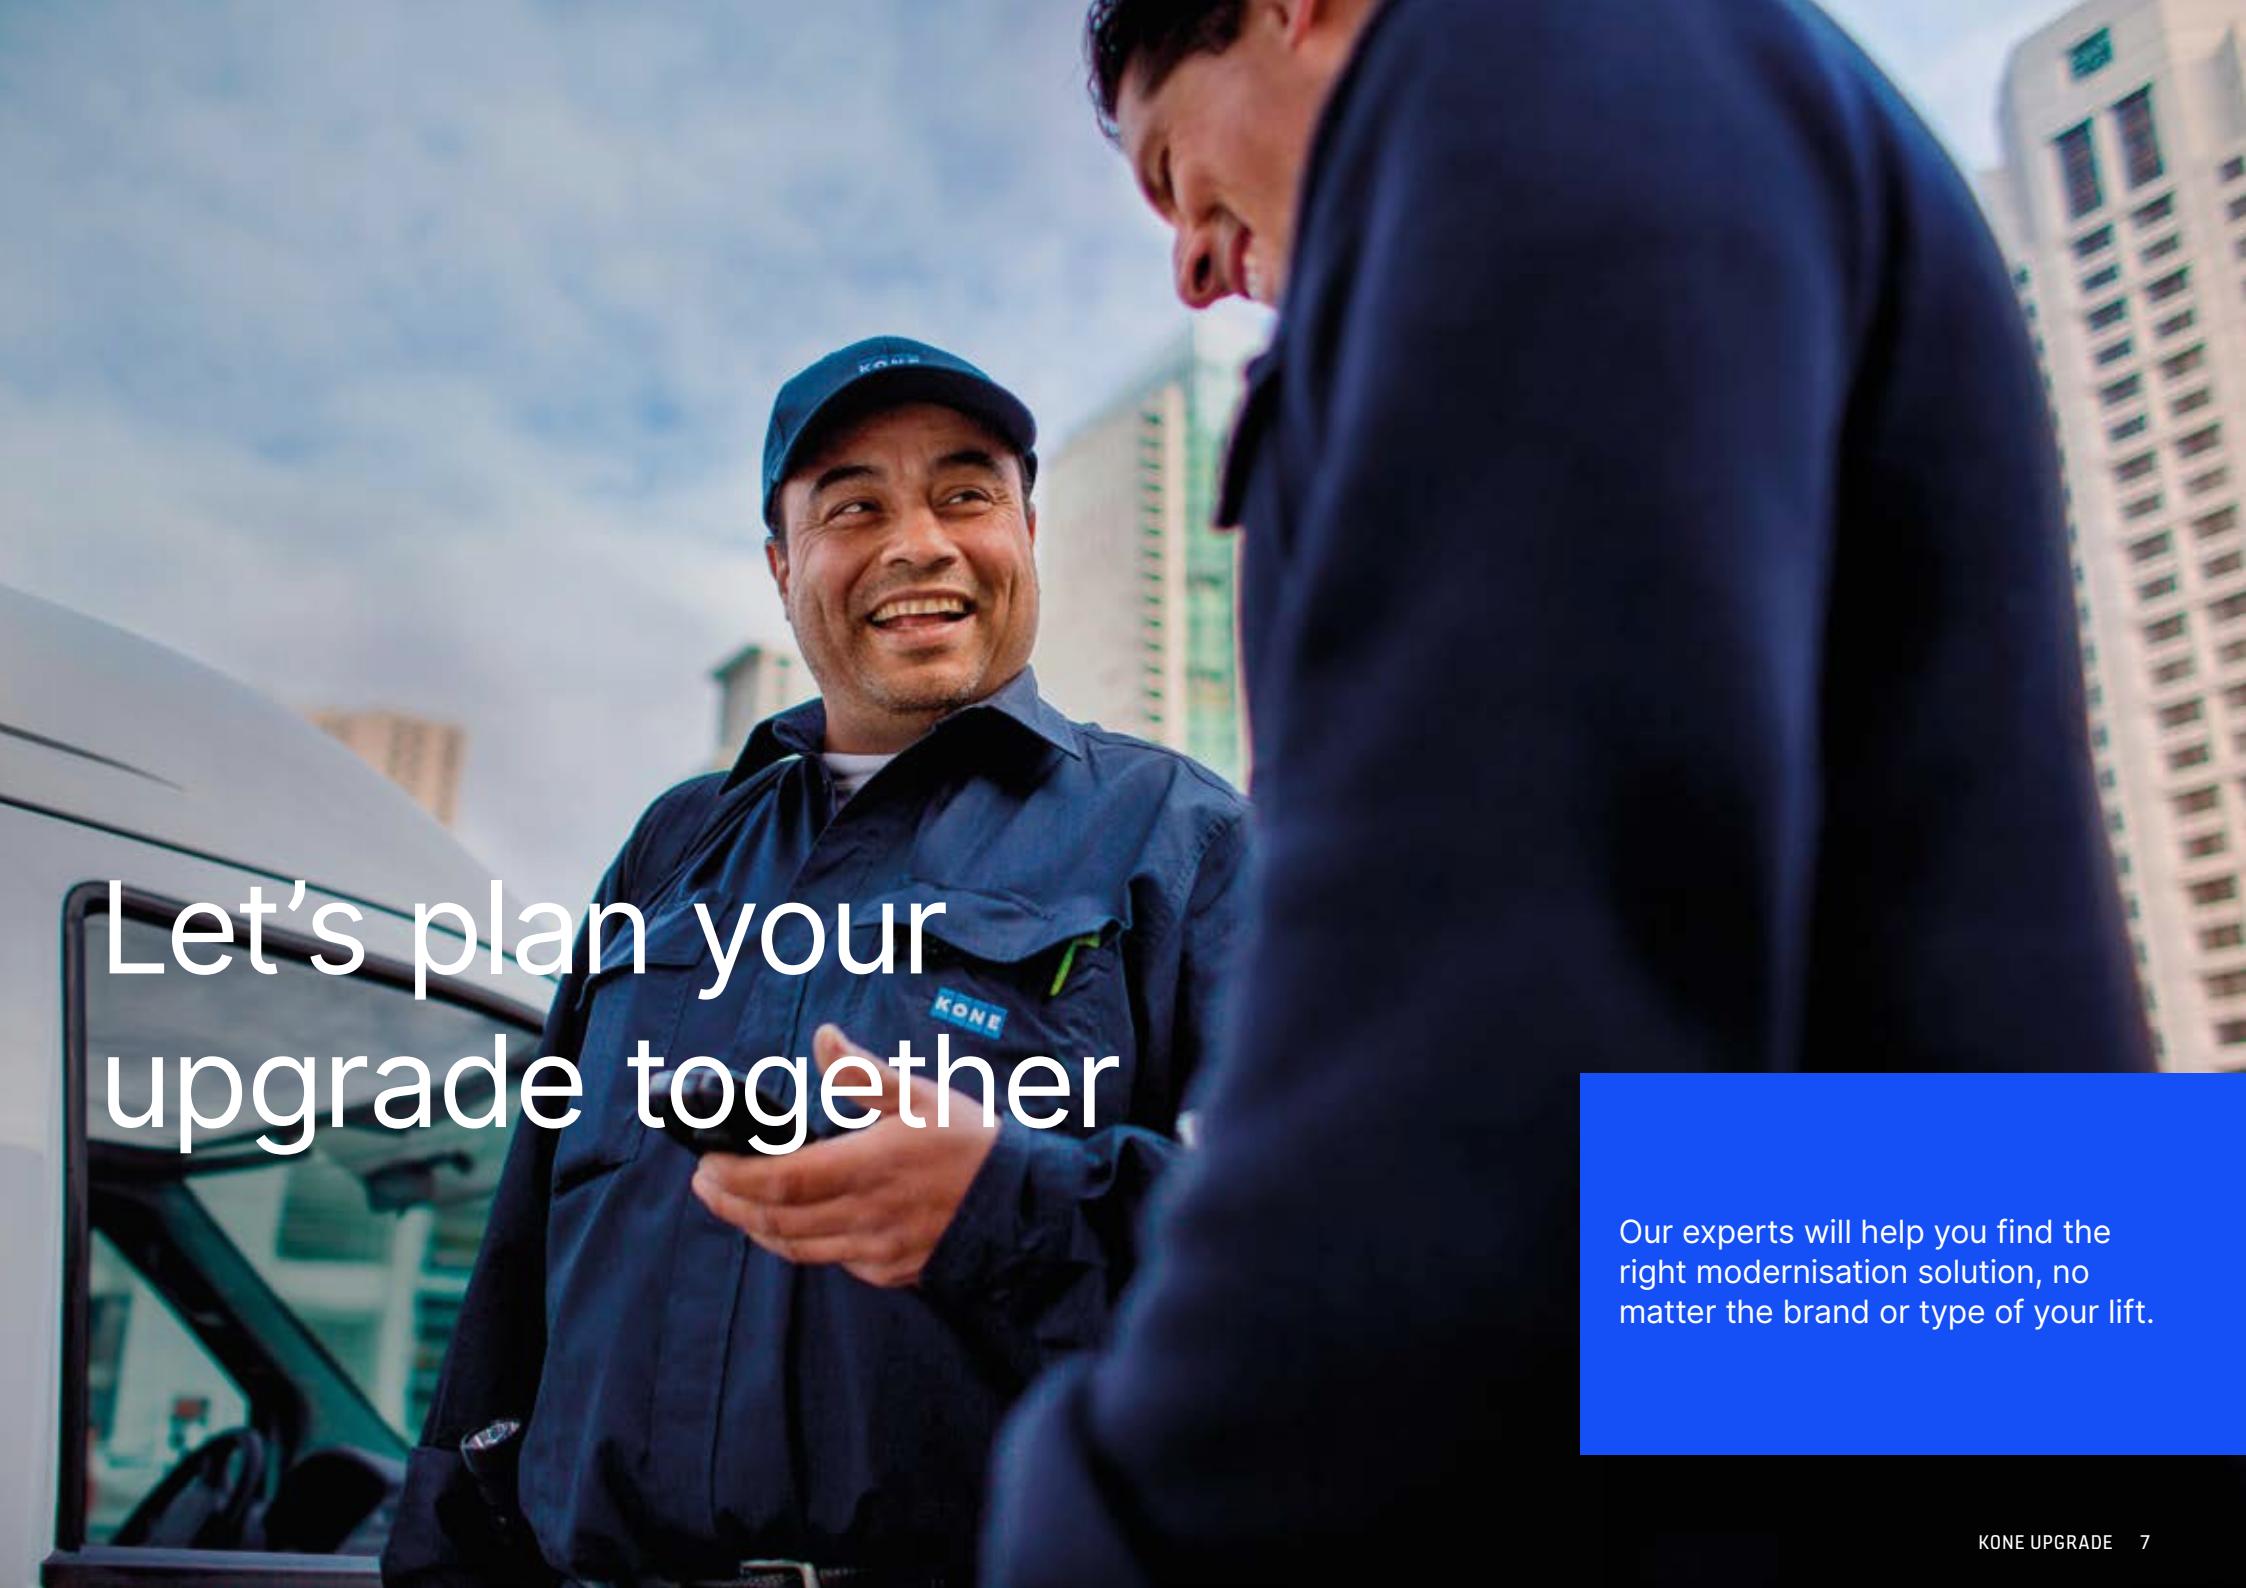

Enhance experience with KONE digital solutions

Take your modernised lift to the next level with mobile lift call, infotainment or destination control solutions.

Introduce seamless flow between partner solutions and KONE

Choose a pre-integrated door intercom, smart locking, or service robot from a KONE Ecosystem Partner to call the lift via KONE APIs – no project-specific integration needed.

Let's plan your upgrade together

Our experts will help you find the right modernisation solution, no matter the brand or type of your lift.

KONE provides innovative and eco-efficient solutions for lifts, escalators, automatic building doors and the systems that integrate them with today's intelligent buildings. We support our customers every step of the way: from design, manufacturing and installation to maintenance and modernization. KONE is a global leader in managing the smooth flow of people and goods throughout buildings. This makes us a reliable partner throughout the life cycle of buildings. We are fast, flexible, and we have a well-deserved reputation as a technology leader, with such innovations as KONE 24/7 Connected Services and KONE UltraRope®. KONE employs over 63,000 dedicated experts to serve you globally and locally.
